

# Iason Kalogiannis

Zografou, Athens, Greece · iasonklgns@gmail.com

## Research Interests

---

Theoretical foundations of deep learning, training & learning dynamics, statistical physics of machine learning, and optimization

## Education

---

**National Technical University of Athens (NTUA)**

Athens, Greece

*Diploma (M.Eng.) in Electrical and Computer Engineering*

2018 — 2026

- Overall grade: **8.34/10**
- Focus on machine learning, signal processing, and optimization.

## Diploma Thesis

---

**Initialization and Optimization of Neural Networks with Ranking Layers**

*Supervisor: Prof. Petros Maragos; Research mentor: Dr. Nikos Tsilivis*

- Derived nonsmooth backpropagation rules for morphological/ranking/linear (MRL) networks using the Clarke sub-differential.
- Used mean-field theory to identify an initialization regime in which forward and backward signal propagation remains stable in deep MRL networks.
- Validated the theoretical predictions of forward and backward propagation on finite width MRL networks trained on MNIST, namely, deep networks initialized within the predicted regime remained trainable.

## Selected Coursework

---

- Pattern Recognition — 10/10,      Matrix Analysis — 10/10
- Digital Signal Processing — 9/10,      Computer Vision — 9/10
- Calculus of Variations and Optimal Control — 9/10
- Neural Networks and Deep Learning — 10/10

## Experience

---

**API Developer — ECE Department Library, NTUA**

2021

- Sole developer of a new API for the Electrical and Computer Engineering department library at NTUA.

## Skills

---

**Programming:** Python, MATLAB, C/C++

**Languages:** English (Proficient), Greek (Native)
